The Forests of Australia

What they are, who holds them and what is changing them

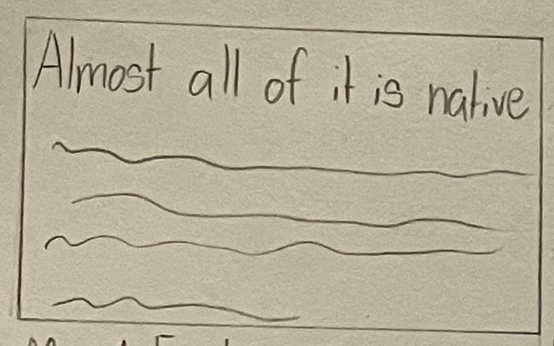

① INTRODUCTION

133.6 Mha ≈	77% ≈	26% ≈	1,227 ≈

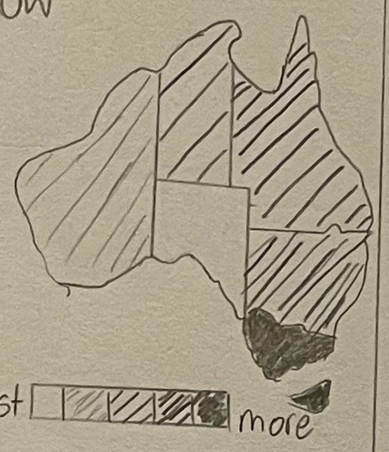

② WHERE THE FORESTS GROW

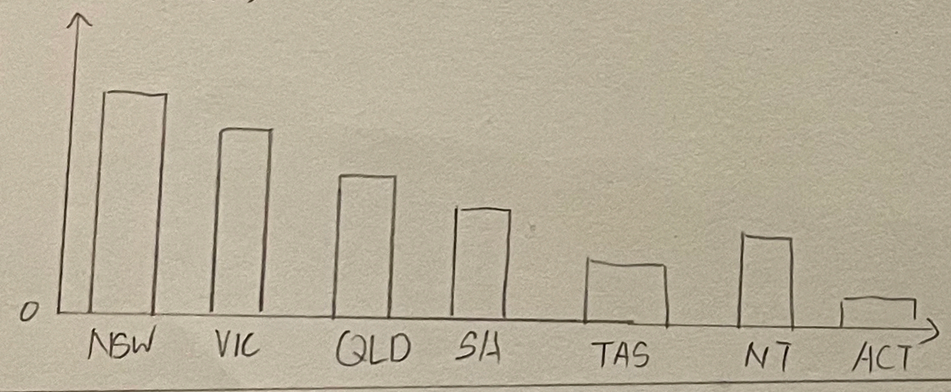

Almost all of it is native

Map 1: Forest cover by region (choropleth map)

Forest area by state/territory (bar chart)

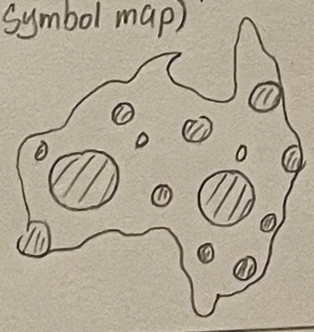

③ WHAT THEY ARE MADE OF

Share of forest types (treemap)

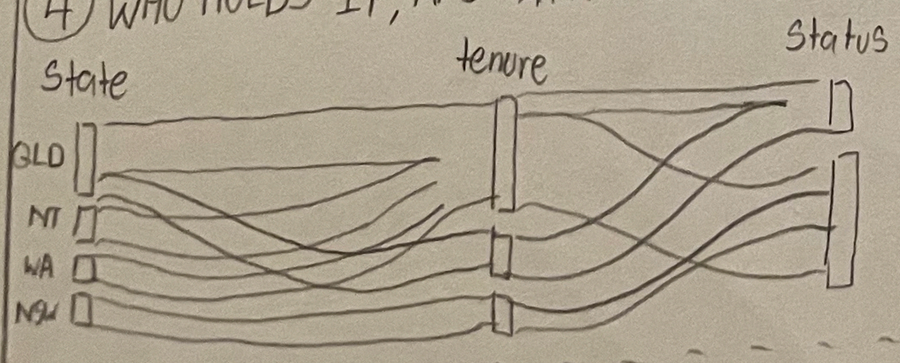

Eucalypt forest	Rainforest
	Acacia forest
Melaluca forest	Other

Map 2: Distribution of selected native tree species (proportional symbol map)

No Records
>10,000
1,000-10,000
100-1,000
<100

④ WHO HOLDS IT, AND WHAT IS SAFE

(Sankey)

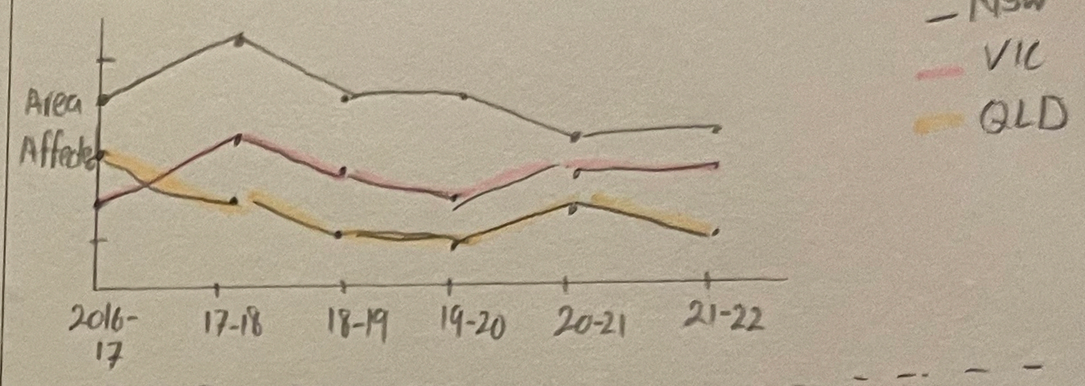

Reserve system 26%
Covenants, other 11%
No protection 63%

(waffle)

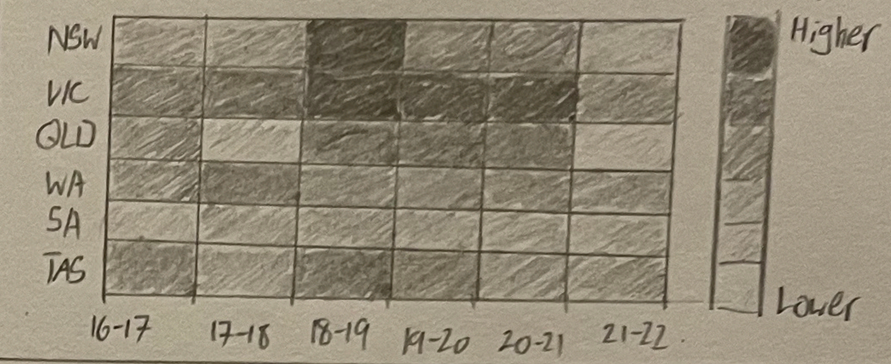

page continues here

⑤ FIRE IN THE FORESTS

Forest area affected by fire over time (line chart)

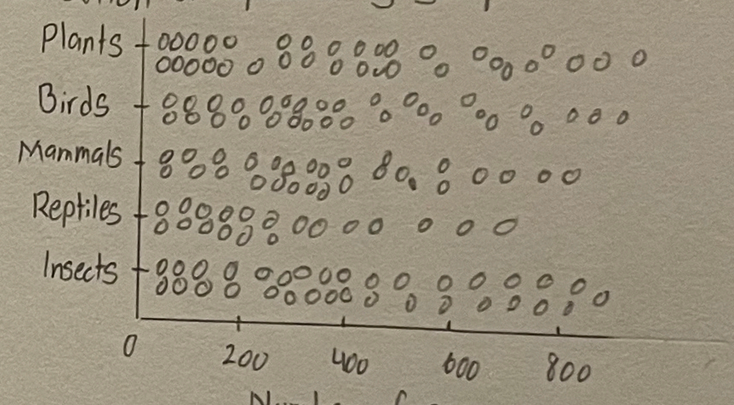

Fire intensity by state and season (heatmap)

⑥ LIFE IN THE FOREST

Distribution of species by group

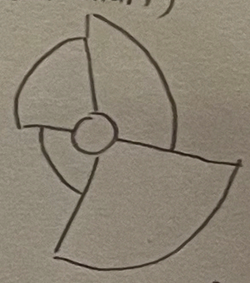

1,227 forest-dwelling species are listed as threatened

⑦ REGENERATION AND CONSERVATION

Forest regeneration activities (dot-density map)

Plantation Age Classes (Radial chart)

Harvested native forest must be regenerated, the map shows where that work happens

⑧ CONCLUSION
